

DRAFT CCH III FRAMEWORK

Priority Area : ENVIRONMENTAL HEALTH

GOAL: Reduce the impact of poor environmental conditions on human health -

OBJECTIVE/PURPOSE: National and Regional capacity to respond to Environmental Health Conditions in the Caribbean improved or enhanced

SUB-PRIORITIES	OBJECTIVES/PURPOSE	NATIONAL EXPECTED RESULTS	INDICATORS	BASELINE INFORMATION	OPPORTUNITIES FOR JOINT REGIONAL ACTION STRATEGIES	INSTITUTIONS	JUSTIFICATION	BUDGET
Institutional Strengthening	To strengthen EH Units/Departments to better address EH needs at the national and local levels	1. EH Strategic plans and annual w/programmes are developed and implemented	<ol style="list-style-type: none"> 1. All EH Units have developed Strategic National EH Plans with defined programmes and budget allocation by December 2010 2. All countries have effective and functioning Port Health programs by 2011 		<ol style="list-style-type: none"> 1. develop a Caribbean Regional Environmental Health strategic plan and guidelines or model for the preparation of national strategic plans 2. Evaluate the status of implementation of the environmental components of the International Health Regulations and prepare regional capacity building 	<p>PAHO, CARICOM, CEHI, Other RHIs, TLIs</p> <p>PAHO, CEHI</p> <p>PAHO, CEHI</p>	<p>Industrial, commercial and domestic development place considerable challenges on the environment as well as expose the population to conditions or risks that may endanger human health. Management of environmental health services for the 21st Century requires greater technical expertise and</p>

			countries by 2010		the assessments 3. Prepare and disseminate generic public awareness materials to EH units	CAREC		
	To strengthen the legal and regulatory framework for EH management at the national level	Harmonized EH legal and regulatory framework implemented in MSs	EH Legislation revised in all Member States by 2012		1. Co-ordinate the preparation of comprehensive model harmonized legislation for EH matters including, governance, water food, solid and liquid waste, vector, and environmental hazard management 4. Mobilize resources to promote the adaptation of the model legislation at the national and regional levels	CARICOM, PAHO, CEHI CARICOM, PAHO PAHO, CEHI, CARICOM		
Water Resources Management (MDG 7)	To improve the management of water resources through a holistic and	1. Integrated water resources management policies and plans	1. 80 % of countries have a functioning Integrated Water Policy program in place by 2012		1. Provide technical guidelines to support countries in developing Integrated Water Policies and Plans	CEHI, IWCAM IWCAM, CEHI,	For many countries water resources are a part of the sustainable development mechanisms as	

SUB-PRIORITIES	OBJECTIVES/ PURPOSE	NATIONAL EXPECTED RESULTS	INDICATORS	BASELINE INFORMATION	OPPORTUNITIES FOR JOINT REGIONAL ACTION STRATEGIES	INSTITUTIONS	JUSTIFICATION	BUDGET
	integrated approach	developed and implemented incorporating the concept of IWRM and Water Safety 2. Relevant legislation for Water Management enforced	incorporating the principles of water safety and IWRM 2. 50% of MSs have management structure to enforce harmonized and/or enacted legislation based on the concept and principles of IWRM by 2013		2.. Provide technical support to countries in promoting the uptake of a) Water Policy and Plan, b) model legislation for integrated water management and c) IWRM and Water Safety Plans	CARICOM CEHI, IWCAM CEHI, IWCAM	recreational waters are part of the tourism attraction and potable water is required for national and visitor consumption. The extensive tourist hotel development places considerable strain on the availability of water for both potable and plant watering usages (e.g. golf courses) Special programs for the management of water resources will enhance the ability of the countries to maximize the use of this vital resource	
	2. Potable and	1. Water supply	1. All countries		Develop and	CEHI, IWCAM

			Potable and recreational waters					
Vector Control	To reduce the incidence of vector borne diseases at the national level	1.EH Units strengthened to reduce the incidence of vector borne diseases reduced	<p>1. Enhanced Integrated Vector control plan and programme adequately resourced is fully operationalized in all countries by 2011</p> <p>2. By 2012 a 50% reduction in the reported cases of vector borne diseases report from base year 2005 in all countries</p>		<p>1. Revision or development of an effective and efficient Caribbean regional vector monitoring and surveillance systems</p> <p>2. Develop and conduct training programmes on Vector Control for EH officers</p> <p>3.Establish a program to reduce vulnerability to vector borne diseases through the sharing of resources and identification of lead agencies or governments</p>	<p>PAHO, CAREC</p> <p>PAHO, CAREC, CEHI</p> <p>CARICOM, PAHO, CEHI, national Governments</p>	<p>Outbreak of vector borne diseases in the Caribbean can have a significant economic impact on the region. Due to the tourism related economy many more persons than residents visit the region annually. Tourists come from around the world, including from countries that have endemic exotic diseases not known in the region. The travel time between sush countries and the Caribbean are well within the incubation</p>

			by 2010					
Liquid Waste and Excreta Disposal	To improve the management of liquid waste and excreta disposal	Countries meet requirements of regional and international agreements re waste and pollution (such as GPA, MDGs)	<p>1. Inter-sectoral programmes for managing liquid waste and excreta incorporating international and regional requirements is fully resourced and operationalized in all countries by 2010</p> <p>2. Regional Guidelines for liquid waste and excreta disposal used as national guidelines by the EH units in 80% of the countries by 2011</p>		<p>1. Provide support to countries to develop, promote and implement plans for Liquid waste and excreta disposal</p> <p>2. Develop and promote the use of regional guidelines as national guidelines/standards for ED and LW;</p> <p>3. Develop and conduct training in the use of the guidelines</p>	<p>CEHI, PAHO, CWWA, CBWMP, UWI</p> <p>CEHI, PAHO, CWWA, CBWMP</p> <p>CEHI, PAHO, CWWA, CBWMP, UWI</p>	Most countries do not have the physical and technical infrastructure to effectively manage, discharge or monitor the impact of liquid waste on the environment. There is an urgency to improve the conditions for liquid waste management since several countries are also experiencing contamination of some of the recreational water sites due to discharge of liquid waste in the marine environment.	
		Appropriate technology options	1. Information on appropriate technology		1. Prepare handbook of appropriate	CEHi
